

OMD 1399

Detergent powder for general use

Application

- Heavy duty laundry powder for flat and work wear, cotton and polyester-cotton.
- Can be used for all wash and machine systems in soft water hardness's.
- Can automatically be dosed.

Properties

- Washes intensively coloured and white fabrics from 60°C.
- Contains natural soap giving a better ironing performance.
- Good soil suspending capacity.
- Prevent incrustation of hardness salts on textile.
- Medium foam profile.
- Does not contain any bleach.
- Economical – low dosage.

Use instructions

Dosage g/kg dry textile:

Pre-wash: 20 – 25; main wash: 10 – 15

Tunnel: 15 - 25

Adapt the dosage depending on the soil degree.

Pre-wash: 5 - 10 min. at 30 - 60 °C
Main wash: 10 – 15 min. at 85°C

Composition according EC-directive

< 5 % Non-ionic and anionic surfactants.

Contains also carbonates, silicates, stabilizers, dispersants, enzymes and optical brightener.

Physico-chemical properties

Density:	894 g/l (untapped)
Total alkalinity (1%):	3.14 g/l 5918 mel
Active alkalinity (1%):	0.98 g/l
pH (1%):	11.5

Environment

- The surfactants in OMD 1399 comply with the European Union Directive EU648/2004 on Biodegradability of Surfactants.
- Does not contain alkyl phenol ethoxylates, EDTA, NTA.
- COD-value: 76.000 mg/kg.

Danger symbol

Irritating

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

Special remarks

Store in a cool and dry place.

Packaging

Bag 25 kg
