

# PERACID ASEPSIS

## Low temperature bleaching and disinfection agent

### Application

- General low temperature bleaching liquid.
- Peracetic acid based bleaching active.
- Chemical disinfection at 40°C.
- Chemical-thermal disinfection between 60°C and 70°C.
- Suitable for both cotton and polyester-cotton.
- For use in soft water.

### Properties

- Delivers excellent bleaching performance between 40°C and 75°C.
- Delivers anti-bacterial, anti-fungal, anti-viral hygiene benefits.
- The product complies with the European disinfection standard EN 1650 (*Candida albicans*, 15 minutes, 20°C, dosage 2 g/l, soiled conditions) and EN 14476 (Bovine Parvovirus, 15 minutes, 60°C, dosage 2.5 ml/l, soil conditions).

### Use instructions

Recommended dosage level: 2.2 g/kg Peracid Asepsis, 15 min, 60 °C, fabric:water 1 : 5.

Alternatively: 2.2 g/kg Peracid Asepsis, 10 min, 70 °C, fabric:water 1 : 5.

### Composition according EC-directive

15-30% Oxygen bleach

### Physico-chemical properties

Density (20 °C): 1.1 g/ml  
pH-value (neat): ca. 0.5

### Environment

- Chlorine free, i.e. no AOX contribution.
- Readily biodegradable.
- COD-value: 248.000 mg/l

### Safety & transport

Corrosive UN 3149  
Oxidizing

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

Use biocides with precaution. Before using the product please read carefully the label and the information about the product.

### Storage

Use above 5°C. Store above -20°C and below 30°C.

### Packaging

Canister 22 kg  
Drums 220 kg  
Container 1050 kg
